

VOSHANA NISSANKA

Software Developer

0412 430 083 | [Email](#) | [LinkedIn](#) | [GitHub](#) | Full Australian Working Rights

PROFESSIONAL SUMMARY

As a full stack software developer, I found incredible passion for technology at the age of 10 through a computer game called Knight Rider, the story of an AI-powered car, which shaped the way I think about using innovation to help society. This passion led me to travel to study at IT Monash University, Australia. Majoring in Software Development, I completed my minors in Data Science and Cybersecurity, allowing me to spot patterns and risks to make informed predictions. Leveraging these skills,

- I built a website and CRM for Parmis Robotics, converting the founder's offline credibility into a scalable online brand and increasing qualified leads by 25%.
- I'm currently leading Flyme Ceylon, a scenic flight tour startup by handling requirements gathering, technical scoping and full-stack development of their booking platform.
- I am actively building independent projects to deepen technical expertise and gain hands-on experience.

I bring strong customer empathy and ability to be calm under pressure. As a Specialist at Apple, I handle product and technical enquiries serving 200 customers per day. My values are centered around creating real impact and difference in the Australian community. Now I'm looking for a full-stack role where I can keep building things that actually solve problems for people.

WORK EXPERIENCE

Product Specialist | [Apple](#)

09/2024 – Present

- Delivered technical support to 200+ customers daily across Apple hardware, software and third-party developer tools (iOS, macOS, Procreate), diagnosing faults and providing repair or replacement solutions.
- Achieved 90%+ customer satisfaction by translating complex technical issues into clear, accessible solutions for a diverse customer base in a fast-paced environment.
- Drove 80% conversion from standard to carrier-included contracts by clearly communicating value and cost savings to customers.

IT Support Officer | [Monash University](#)

05/2025 – Present

- Delivered technical support for 800+ students during digital exam sessions, maintaining 100% system uptime with zero technical glitches.
- Resolved 30+ technical issues per session within a strict 10-minute timeframe, while monitoring E-Vigilation and Slack channels.
- Identified and implemented process improvements while maintaining detailed technical logs contributing to outage prevention.

Software Developer (Contract) | [Parmis Robotics](#)

07/2023 – 11/2023

Parmis is a start-up specialising in high-quality after-school robotics courses.

- Designed and built a full-stack CRM platform (HTML, CSS, JavaScript, PHP, SQL) with customer management, e-commerce and enquiry handling, reducing manual effort by 15-20% monthly.
- Built a scalable customer enquiry portal with CRUD functionality, converting the founder's offline credibility into an online brand and increasing qualified leads by 25%.
- Applied object-oriented programming principles and UI/UX best practices to deliver clean, maintainable frontend components with a consistent user experience.
- Worked in an Agile environment using Git-based version control and CI/CD practices, contributing to solution design documents and technical feasibility discussions.

Measurements- Tailoring Company (Contract)

03/2023-06/2023

- Designed, built and deployed a full-stack client website in an Agile development environment with Git based version control for a business in the fashion industry to showcase their services, increase sales and handle enquiries in a self-service and scalable way.
- Worked alongside the BA to understand client needs, to help create the SDD for the project
- Moved business operations from paper to digital while allowing the client to respond to enquiries quickly, and in real time reducing manual effort by 20% saving 15 hours per week.

SKILLS

Languages & Frameworks: Python • JavaScript • HTML • CSS • C++ • Node.js • Express.js • React • Docker

Databases & Data: PostgreSQL • MongoDB • SQL • Pandas • Tableau

Core Competencies: REST APIs • Database Design • Git • CI/CD • Agile • SDLC • Secure Coding • Testing & QA

AI & Dev Tools: Claude Code • Cursor • AI Automations • API Integration • N8N • Tally

Tools & Collaboration: Figma • Webflow • Trello • Postman • Stakeholder Communication • Requirements Gathering

Certifications

Technology Job Simulation | deloitte - Forage

Completed a Deloitte technology simulation, developing a software solution proposal and coding a dashboard prototype to meet requirements.

Deloitte Cybersecurity Job Simulation | Forage

Completed a Deloitte cybersecurity simulation, analysing web activity logs and network traffic to investigate a simulated client data breach.

PROJECTS

Pursuit - AI powered Job tracker (07/2026- Present)

[Github Repository](#)

- Built a full-stack job application tracker in Python and Flask, with a relational SQLite schema and parameterised SQL powering a real-time analytics dashboard.
- Implemented secure authentication with hashed passwords and session-based access control to restrict data access to the authenticated user.
- Designed and wrote all backend query logic independently, including grouped aggregations, date-range calculations and edge-case handling.
- Planned addition: integrating the Claude API to score resume-to-job-description fit, using structured prompting to return a match score with supporting reasoning per application.

Spendlens - AI-Powered Personal Finance Tracker - Independent project (2025- Present)

[Github Repository](#)

- Built a full-stack finance application using Next.js, TypeScript and Supabase, designing the PostgreSQL schema, row-level security policies and API routes handling transaction data.
- Integrated the Anthropic Claude API to generate monthly spending insights, handling rate limits, error states and prompt design for consistent structured responses.
- Implemented secure user authentication and per-user data isolation, ensuring financial data integrity across accounts.
- Designed heatmaps and financial scoring to visualise personal spending per month, with AI insights on monthly progress and investment portfolio performance.

World Happiness Index, Web based visualisation and analysis (2023)

[Tableau Visualisation](#)

An interactive data project exploring how global factors influence societal happiness and wellbeing.

- Extracted, cleaned and transformed multi-variable datasets in **Pandas and Excel**, to build a baseline data model and schema for tracking diverse global happiness metrics.
- Designed and built interactive Tableau visualisations in a webpage using **HTML, CSS and Javascript** to showcase correlations between GDP, happiness index and suicide rates across rich and poor countries.

YelpCamp, Camping web app (2024-2026)

[Github Repository](#)

A full-stack web app helping tourists discover and review campgrounds with interactive maps and community reviews.

- Built a full-stack platform with secure user authentication for discovering and creating new campgrounds across the US.Used **HTML, MongoDB, Express.js, Node.js technologies**.
- Added features like **personalised user profile, adding new locations, writing reviews and pinch/zoom capabilities** using **MapBox API** to show real time interactive maps across different US states.

EDUCATION

Bachelor of Information Technology | Monash University, Australia

02/2022 – 05/2024

Major: Software Development | Minors: Data Science, Cybersecurity

- Bachelor of Information Technology with majors in Software Development and minors in Data Science and Cybersecurity, providing a comprehensive technical foundation across full-stack development, data analysis and security practices.

Diploma of Information Technology | Monash College

02/2020 – 06/2021

VOLUNTEERING

Student Representative | Monash Student Association

03/2022 – 05/2024

- Assisted in organising large-scale university events, coordinating logistics and supporting student engagement initiatives.

Charity Officer | Monash University Sri Lankan Cultural Club

05/2023 – 04/2024

- Coordinated charity events supporting underprivileged communities in Sri Lanka.

Director of Community Service | S.Thomas’s College Interact Club

11/2018 – 11/2019

- Organised a healthcamp for 400 residents of rural Sri Lanka, coordinating medical teams and fundraising for school construction.
